ABOUT LAUFEN

The personality of this highly traditional Swiss brand reflects a symbiosis of design, quality and functionality. LAUFEN is one of the world's leading manufacturers of bathroom fittings with a global distribution network.

The company's core competence is its knowledge in the area of sanitary ware manufacturing. Over 125 years, the LAUFEN brand has been using the oldest malleable material known to man to make innovative sanitary products in state-of-the-art plants with legendary Swiss precision. Knowledge of the bathroom as a whole is developed from the competence of LAUFEN in ceramics manufacturing and sophisticated design. What makes LAUFEN products unique at first glance is that their Swiss design unites two major design trends: emotional Italian European design from the south and the northern tradition of design precision and clarity.

For LAUFEN, quality has two aspects: manufacturing knowledge and high degree of practical benefit that the finished bathroom affords the customer – which is often not immediately apparent. LAUFEN, a Swiss company manufacturing products that allow water, a precious resource, to be used sparingly, demonstrates in this manner a commitment to preserving natural resources and environmentally-friendly production.

LAUFEN DESIGNERS

Marcel Wanders

Marcel Wanders is an industrial and interior designer, whose acclaimed studio, founded in 1996 and bearing his name, is credited with more than 1,900 projects. His designs are celebrated in the world's most renowned museums, including the Centre Pompidou and MoMA. In 2001, Wanders co-founded the successful design label Moooi, in which he acts as owner, art director, and product designer.

Stefano Giovannoni

Stefano Giovannoni was born in 1954 in La Spezia, Italy. He studied architecture in Florence. From 1989 onwards, he designed the successful Girotondo accessories collection for Alessi.

Today, he lives and works at Studio Giovannoni, on restored former factory premises in the centre of Milan. As well as industrial products, he also designs interiors and architecture.

Ludovica+Roberto Palomba

Ludovica Serafini and Roberto Palomba studied architecture at Rome University. In 1994, they founded their Milan-based company together.

They have made a name for themselves with their unconventional interior designs for bathrooms, kitchens, and living spaces. Their concepts unite their intuitive grasp of architecture, lifestyle, and industrial objects to create exceptional designs.

Konstantin Grcic

Konstantin Grcic was born in 1965 in Munich, Germany. After training as a cabinetmaker at the John Make-peace School (Dorset, England), he studied industrial design at the Royal College of Art in London.

In 1991, Grcic established his studio, Konstantin Grcic Industrial Design (KGID), in Berlin and is now one of the leading industrial designers of the modern era.

Toan Nguyen

Toan Nguyen was born in Paris in 1969 and graduated from ENSI-Les Ateliers in Paris as an industrial designer. Nguyen gained experience by working in various design offices in Paris, Barcelona, and Madrid before working with Antonio Citterio as a design director and design partner. Toan Nguyen set up his own design studio in Milan in 2008. The Toan Nguyen Studio is multidisciplinary, specialising in design development in various product areas.

Peter Wirz

"Design of the human touch": This is the motto of the Vetica design workshop, which was founded in 1997 and has branches in Lucerne, Taipei, Hamburg, and Hong Kong. The international team around Swiss designer Peter Wirz, who was born in Brienz in 1960, supports the development processes of industrial products with regard to both form and function, acting as a generator of ideas - going above and beyond pure design, which it sees as an interdisciplinary process in a wider context.

SHOWER TOILET CLEANET RIVA

Pure theory takes shape - in the form of a flawlessly designed unit featuring a technically advanced interior. The visionary concept is apparent in the strikingly sensitive design of this incomparable shower toilet, which boasts an intuitive stainless steel control system. Thanks to its patented technology, this design takes the holistic approach - incorporating design, comfort and hygiene - to an entirely new level, and has been rewarded with the most prestigious design awards.

Minimalist compact design similar to a standard toilet

The exchangeable shower head is lowered into the ceramic body with a cover ring

Enclosed ceramic body with hidden water and electricity supply

LED night light with signal function

Hygienic and easy to maintain thanks to its shape without flushing rim and the LCC-finished ceramic surface

Various user profiles, which can be programmed via remote control

Intuitive operation using the rotary button or by remote control

Integrated self-cleaning functions with thermal cleaning and automated descaling

Powerful yet gentle shower jet with optimal distance and angle

Removable seat and cover made of Duroplast with lowering system

Gentle lady shower with separate button

Thorough shower head cleaning before and after each use

COMING SOON

THE NEW CLASSIC

A collection of perfectly shaped innovations for the bathroom. The New Classic radiates the practicality of the harmonious form and combines it with contemporary style. A clear formal expression of modern elegance comes into being which celebrates the bathroom as a place of cleanliness and purity. The award-winning technological quantum leap of Saphir-Keramik turns every piece into a witness of progress and has been rewarded with the most prestigious design awards.

ILBAGNOALESSI ONE

Italian architect and designer Stefano Giovannoni breaks out from the repetition of form of room geometry, which only ever produces the same templates. He leaves worn stereotypes behind and combines the extraordinary with the popular. Well-known structural frameworks suddenly evoke irregular, subtle associations that dissolve the principles of perception and open up new spatial worlds. However, the newly conceived contours of the Italian architect and designer are not only reflected in the first complete bathroom scenario for ILBAGNOALESSI ONE. They are also knighted by the exhibition in the permanent collections of the Centre Georges Pompidou in Paris and the Museum of Modern Art in New York.

PALOMBA

Water, as a source of life, represents the source of inspiration for Ludovica and Roberto Palomba. This was noticeable with all senses when the successful PALOMBA COLLECTION from LAUFEN was launched. The intensive connection with the fluid and sparkling element finds its definition in the formal language, which the famous Italian designer duo describes with the expression "fingerprint of nature." The tension between strict geometry and organic form characterises the entire collection and ensures that all pieces come closer together. In the extension of the PALOMBA COLLECTION, soft, organic lines present themselves as harmonious elements that also enable the most demanding bathroom designs.

KARTELL BY LAUFEN

Ludovica and Roberto Palomba continue to play off the strengths of the Kartell by Laufen range of icons with the greatest of ease, lending physical form to the endless options available by combining colours, forms and surfaces. New washbasin creations of this design classic in an extremely compact form and created from revolutionary SaphirKeramik. For your own freedom in bathroom design. For decisions with sense and feeling. For an unparalleled amount of space. For tangible quality that leaves nothing to be desired.

VAL

A material that offers new possibilities, a designer who pursues new ways, a connection that creates new worlds. For a bathing experience that awakens unknown emotions. With his evolutionary designs, Konstantin Grcic architecturally stages the revolutionary SaphirKeramik from LAUFEN, thereby completing the bathroom collection VAL. Clear geometric lines, extremely narrow edges and finely textured surfaces united in harmony, open up a unique category of bathroom culture.

INO

Toan Nguyen does not allow himself to be locked up. He loves expansiveness. Both mental and physical. This is also reflected in the new bathroom collection, which the French designer has designed for LAUFEN. Immaculate objects with simple lines and delicate yet extremely stable walls conjure up an elegant, inviting and almost weightless look. A new interpretation of classic forms which not only touches the hearts of hard-line purists.

LAUFEN PRO S

With lots of sensitivity Peter Wirz brought about a systematic, production-optimised evolution of the PRO concept. Thanks to its slim silhouette and clearly-defined radii, the washbasin has a light and elegant, appearance. The deep bowl means that it's also functionally appealing. The aesthetics of LAUFEN PRO S therefore definitely take the range in the direction of LAUFEN's premium design lines – while remaining affordable by all.

LAUFEN PRO A

A classic design integrates unobtrusively into the living space and sets timeless benchmarks. This forms the vision of the LAUFEN PRO A series, which adapts to every room situation with the most modern design and inspires with numerous variations of imaginable ceramic art. Designer Peter Wirz has designed a bathroom programme that has been intelligently optimised for the ceramic production process. Democratic design thus finds its place even in bathrooms suitable for generations.

LAUFEN PRO B

Elegance and function combined. Semi-circular washbasins in various sizes. Suitable for any type of use. The elegant shape is striking, as well as the raised rim in the Laufen PRO B series. This is a wash-basin which makes a good impression everywhere.
